

FORT LA BOSSE SCHOOL DIVISION

TITLE - **EMERGENCY PLAN***

POLICY - **EBCA**

Resolution # - 27/18

Cross Reference - **EBC**

Legal Reference -

Last Reviewed - 12/02/18

The Board has authorized the development of an Emergency Response Plan (ERP) designed to assist the Principal and Staff of each school in successfully performing the following objectives:

1. To provide for the physical safety and well being of the children entrusted in their care;
2. To provide first aid in case of injury during an emergency situation;
3. To evacuate children to a place of safety and to provide for their continued care until they can be returned to their families; and

To inform and educate our students, staff and parents of the procedures that are recommended in various emergency school/community within the Division is unique unto itself and that the environment within which the schools operate and the resources available vary sufficiently enough to work against the development of a common set of procedures.

However, the Board believes that, in certain specific circumstances, some common procedural directions will provide support should a particular emergent situation arise. Therefore, specific directions have been included to provide a response structure in the event of:

Adverse Weather

Bomb Threat

Bus Accident

Chemical/Hazardous Materials

Child Removal

Evacuation Procedures

Explosions

Failure of Services

Fire

Medical Emergencies

Violent Person(s) Threat

Weapon(s) Threat
