Resolution # - 255/04

Implementation - 28/06/04

Legal Reference -

Last Reviewed - 27/02/12

The aim of the Physical Education/Health curriculum in Fort La Bosse School Division is to provide each student in the division with planned and balanced programming to develop the knowledge, skills and attitudes for physically active healthy lifestyles.

Guidelines

Schools in Fort La Bosse School Division will provide information resources outlining the Physical Education/Health curriculum for each grade upon request.

Fort La Bosse School Division will provide grade-specific in-services for the following learning outcomes: Human Sexuality, Substance Use and Abuse Prevention, and Safety of Self and Others.

The Board of Trustees encourages the use of community resources and expertise in delivering the health topics in the classroom.

For student learning outcomes related to potentially sensitive issues, schools must seek parental involvement and provide a delivery option prior to implementation.

A form letter will be sent out to the parent/guardian to be signed and returned prior to the commencement of the instruction of the units which contain the potentially sensitive content.

In the letter, a choice of school-based program delivery or alternative/home-based delivery will be given.

If the school-based program delivery is not desired by parent/guardian, it will be the responsibility of the parent/guardian to instruct his/her child based on the Manitoba Health Curriculum.

Consent to proceed with the School-based program delivery for the potentially sensitive units will be assumed where the letter providing the option is not returned by the parent/guardian within the given time frame.
