Resolution # - 265/02

Implementation - 20/08/02

Legal Reference -

Last Reviewed - 09/04/12

The Fort La Bosse School Division has provided computer network access and established Internet access that connects schools, the Division Office, and support buildings to the World Wide Web. This network connection is provided for staff and students to support instruction, conduct research, and communicate with Internet users throughout the world, and to aid in the administration of the operations of the School Division.

It is a general expectation that all Fort La Bosse School Division computer resources are to be used in a responsible, efficient, ethical, and legal manner in accordance with the mission statement and stated policies and regulations of the School Division.

To that end, we believe that it is the responsibility of all staff and the parents to work together to help students develop the network skills and attitudes necessary to:

- identify material which is both age and developmentally appropriate
- discriminate between acceptable and unacceptable information
- evaluate the accuracy of information.
