Resolution # - 216/03

Implementation - 23/06/03

Legal Reference -

Last Reviewed - 09/04/12

The Internet is quickly becoming the medium of choice for disseminating information. The Board realizes the potential school websites hold as an informative source for keeping communities informed of events and activities at school as a public relations tool to improve enrolment.

The Board therefore expects that each school in the Division will make an effort to have a presence on the World Wide Web through a school website. In addition, the Board reasonably expects that the school will make every reasonable effort to ensure that the content presented on the website changes regularly and, more importantly, is kept current.

While these goals are warranted to be important, schools must ensure that in attempting to meet these goals the safety and interests of students are preserved. To this end no website shall be posted until the school administrator has provided assurance that it meets all the Division guidelines for content and safety of children.
